

Your fast entry to technical and business study courses

in Germany

Freshman year is the preparatory year for a three year Bachelor's program. Students from all over the world study in small groups in a unique intercultural environment, expanding their intellectual horizons while preparing for a future as engineers and business managers in today's global economy. Upon successful completion of the Freshman year, you can apply to one of our Bachelor's degree programs in engineering or business at our university or one of our partner universities listed below. After your Bachelor's degree can continue your studies in a Master's program.
